FOR

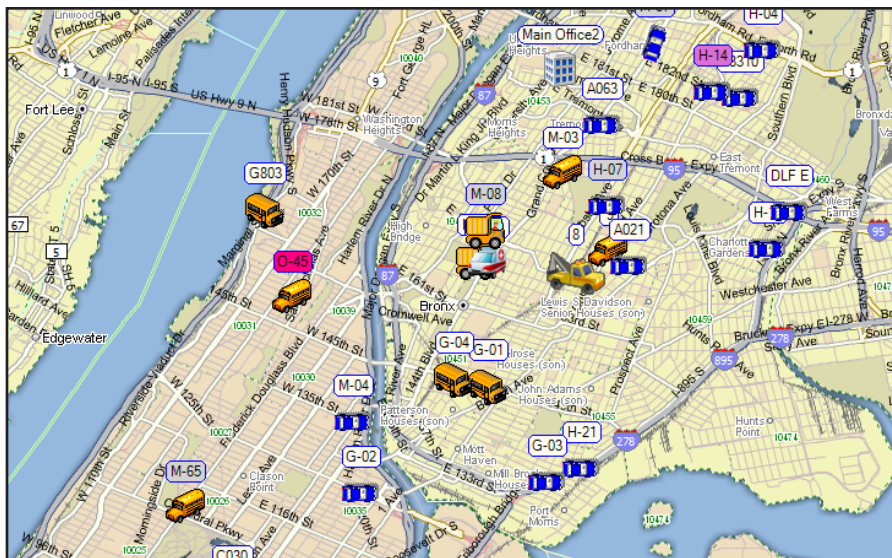

MOTOTRBOTM

Professional Digital Two-Way Radio System

Real-time asset tracking and management with high-resolution Tele Atlas maps.

StreetTrek³TM is the industry's leading asset management solution for MOTOTRBOTM Professional Digital Two-Way Radio Systems. This powerful software solution provides dispatchers and administrators with real-time asset tracking and management capabilities with high-resolution Tana maps to improve operational efficiency.

- High-resolution, US street level Tana maps provide greater detail for precision tracking. Optional country maps, custom maps, satellite maps, and picture integration are available.
- Highly customizable map layers allow users to adjust the display for their specific needs.
- Address search, street directionality, and landmarks work with satellite map integration to provide advanced tracking.
- Advanced features, such as geofencing and telemetry with both visual and audible alerts, provide greater asset monitoring and control. Geofencing and emergency notifications with email alerts.
- Multiple map views, customized asset graphics, and asset history reports with breadcrumb trail allow for individual assets to be easily tracked. (Reports may be exported in CSV or TXT formats)
- Optional Milsoft and NISC integration with appropriate server.
- Online updates allow StreetTrek³ to operate with the latest data and functionality.
- StreetTrek³ integrates seamlessly with StreetTrek Location and Messaging ServerTM, TrboDVR ServerTM, Capacity Plus and Connect Plus ServersTM, allowing for multiple clients.

Contact us today to find out how StreetTrek³ can help you better manage your mobile and portable assets.
